Slide 1

Welcome everyone.

Tonights presentation is somewhat similar to the movie:- **The Matrix**. If you recall, Neo is offered a choice.

The **blue** pill allows him to go back to his life as he knows it, nothing changes. The **red** pill allows him to see the **truth** about the Matrix.

Tonight, I am offering you that same choice… If you are happy with the way government is treating you, your choice would be to leave this presentation, and return to what you know.

Or:- stick with me, and gain the knowledge to see through the Matrix;- that is the corporate system!

(pause…)

Before I take you on this journey, I ask that you open your mind to the possibility that you and I have been deceived our **entire** lives.

Unfortunately, our lack of knowledge in this area, has been our biggest downfall.

So, what exactly has been done to us, and how can we fix it?

Slide 2

The acronym LAW stands for Land, Air and Water

Are you aware that the world is governed by three realms or Jurisdictions, and you are currently being administered under the wrong one:

– **Air:** Covers municipal and global jurisdictions. This is where non-tangible things like religion and ideas are governed…

– **Water (Admiralty/Maritime):** The International Jurisdiction of the Sea. This is the realm of commercial contracts, statutory law and the corporate “government”. This is also where Citizens are currently drowning in commercial contracts. This is where we currently find ourselves.
I’ll explain a little more about this later.

– **Land and Soil:** This is the *de jure* jurisdiction. The realm of the living man and woman, governed by **common law** where inherent rights are guaranteed.
This is where the "Assembly" functions and is also where we belong.

Our mission is to remove ourselves from the corporate jurisdiction of **the wate**r, and return to the common law jurisdiction of **the land and soil**.

Now, why on earth would we want to do that?

Well, the simple answer is that we want to regain the **control** over our lives that we have lost in the corporate system, by being controlled in the wrong jurisdiction.

Slide 3

The hierarchy of authority *(basically, who controls what and where do rules come from?)*

– This is quite a bit of information, so you may want to take notes for questions to be answered later.

– At the top are the **Laws of Maxim:** these are bliblical laws, considered to be the highest **laws of the land jurisdiction**.

Laws of Maxim include **inalienable rights.** These are fundamental, natural privileges that belong to every living man or woman by birth, and cannot be sold, given away or taken by any government.

SLIDE 4 Next up, **what is a Sovereign?**

You and I are **Sovereigns**. We are living men and women, born on the land and soil, who operate under God's Laws. As sovereigns, we have the ability to create laws and constitutions, both for ourselves and for the businesses we create.

So, what do we control?

– First, **Contract Law:** This is a set of laws which sovereigns world-wide adhere to, in business: in other words, it sets out very simple rules regarding trade.

Offer + Acceptance = **Contract**.

– Second, **Treaties:** these are laws between sovereigns that cover anything to do with land;

– Thirdly, we control **Constitutions:** These are delegated powers and service agreements, established by the people for contractors to follow. For example: maintenance or services provided to us.

Now we enter the realm of Corporations:

What is a Corporate Fiction:

Corporate contains the word corpse… which refers to a dead entity. It is something created by man:- not a living thing.

– Here you see the hierarchy of authority within the **corporate world** functioning in the **Water Jurisdiction**.

Federal Codes govern **corporations:** corporations cannot create laws that rule over or control a soveriegn. Corporations can only contract with other corporations, **not with living people**. (*This is important to remember for later)*

Police corporations are private agencies that control **Citizens.**

SLIDE 5 **Citizens** are persons who do not have rights, but rather owe allegiance and duties to a governmental entity. This is also known as a **STRAWMAN**.

The **STRAWMAN** was created so that government can interact with, and ultimately control, people!

***This is our current position**, and I'll elaborate on this shortly.*

Slide 6

How was the STRAWMAN created?

The greatest fraud committed against the individual is the "**unlawful conversion of living people into corporate fictions also known as 'persons' or STRAWMEN.**"

– When your birth certificate is registered, it registers you into the wrong jurisdiction. You are thereby changed from a living girl or boy on the land jurisdiction, into a dead **corporate person or STRAWMAN.**

  Think of it as a photograph of you… it looks like you, but the photograph is not alive, it's a paper representation of you!

  A **corporate trust** is then created using this STRAWMAN which has collateral value.

  This STRAWMAN allows the corporate government to interact with and control the living being through commercial law, fraudulent taxation, and licensing, stripping away your inherent rights by substituting the STRAWMAN in place of a living man or woman.

Slide 7

– So, we now know that a **coporation** can only contract with **another corporation**, and this is why living men and women are registered as **corporate fictions or STRAWMEN, at birth**.

– **South Africa** was one of the first Countries to have "governmental services" supplied and performed by a **company**, as a **business** – for profit...

  Cecil John Rhodes founded the British South Africa Company (BSAC) in 1889, which was granted a royal charter to administer and exploit territory (as a "government") in central and southern Africa.

– **In 1995 South Africa Inc. is born.** A foreign, federal, privately-owned corporation, incorporated into U.S. Governing Law – New York.

  Do the research yourself, you will find that South Africa is also registered in the Commonwealth as a British Crown Corporation.

Slide 8

From Statutury Citizen to State National

It is essential to understand the differences in political status, in order to reclaim your rights:

Pre-1950 we were imperial subjects, under British sovereignty, legally tied to the Crown.

– Post 1950 we became a **Statutory Citizen,** which means that you are a subject who has an obligation to serve the corporate government (corporation) as an employee, dependent, or contractor.

Where we want to be:

– A **State National** is a sovereign individual who belongs on the physical land and soil of their province/county. They are the rightful owners of the land.

– A **State citizen** *(lower case 'c")* is a State National who chooses to serve the lawful **land and soil Assembly** (for example, as a juror or holds an elected position within the Assembly).

Slide 9

In order to gain control of our STRAWMAN, we need to understand that **Municipal or Corporate Legal Systems** use identifiers such as name, ID number and birth records: to interact with real, living people.

Because you, as a living man or woman, are effectively tied to those records *(via your STRAWMAN)* under their **legal system,** you become subject to corporate law.

Understanding this allows you to assert your rights more effectively.

Slide 10

According to the Constitution of South Africa, we have the right to exercise self-determination; this is the recognition of **community authority** within South Africa.

Authority is inherent in the **people**, not granted by the state.

The South African Assembly uses this right, to form a lawful system of governance for the people, by the people under common law principles where the power comes from the living men and women born on South African soil.

Slide 11

How do we organise a lawful, land and soil jurisdiction, de jure self-governance assembly?

Every Assembly (District/County, Provincial, and National) **rests on four essential pillars:**

- ### The General Assembly

  This is the heart of the Assembly, where all South Africans gather.

  Policies and guidelines are determined here by consensus.

  Only those who have corrected their status to the land jurisdiction, may vote on these guidelines.

  Transparency ensures that power remains with the people and not with a small elite.

- ### The Jural Assembly

  Is responsible for upholding the law of the land under South African Common Law.

  Self governance means no lawyers as there are no complicated **legal** issues to overcome. Common law is a simple system. Disputes are settled by a jury of your peers, within the structure of common law rights.

  Land magistrates, clerks, and Justices of the Peace are all elected by the people and held accountable to the people.

  The focus of common law is on **truth** and **restitution**, rather than punishment and fines alone.

- ### The Business Assembly

  This pillar handles the economic and physical assets of the people of the Assembly.

  The establishment of trade banks that operate in real value goods and assets is organised here.

  The maintenance of an independent Land Recording Office (LRO) to document status correction, record births, deaths and unions as well as ownerships outside the corporate system, is all part of the Business Assemblys' purview.

  Management of resources to benefit the community.

- ### The Militia/Peacekeeping Assembly

  Ensures safety and the enforcement of the law without corporate tyranny.

  Justices of the Peace are officials who protect the land jurisdiction and the courts.

  The **Assembly Militia** is a civil peacekeeping force made up of community members. They act only under the authority of the Assembly to protect life, liberty and property.

  Disaster management, preparedness and **planning** is also part of this assemblys' portfolio.

Slide 12

You cannot simply opt out of the **Water jurisdiction** by ignoring it; you must lawfully and administratively correct the public record.

The Land Recording Office or LRO acts as a bridge to reconvey you from the water jurisdiction and get you permanently domiciled back on the land and soil. We are no longer drowning in commercial contracts.

By **correcting our status**, we have a public recording of our **chosen jurisdiction** (land and soil) where we claim back our common law rights, and become **South African State Nationals**.

The LRO not only **records**, **stores** and **publishes** each Nationals' Status Correction documentation but also any other documentation required in the functioning of a **common law society**.

Slide 13

There is a simple process to generate the documents needed to **status correct**, or **emancipate.** Full instructions are provided on our website on how to become a free man or woman on the **Land and Soil**.

- Create a profile and **generate** internationally recognised documentation by completing the form provided.
- Upload and record your correctly completed documentation.
- These documents will then be verified and published while issuing a unique recording number and timestamp for lawful standing.

Slide 14

528 – Status Correction: This is the foundational document that officially corrects the public record, serving notice that you are no longer operating merely as a corprorate fiction, but as a living man or woman on the land. Documentation must be sent to Home Affairs.

928 – Emancipation: These documents are the supreme affirmation of sovereign status. A formal declaration severing presumed ties to the commercial jurisdiction of the sea, affirming permanent domicile on the Land and Soil. Documentation must be sent to various additional governmental departments.

Together, these sets of documents construct the **full armour** required to lawfully populate the de jure Government.

Slide 15

We the people are not lost at sea anymore, **we are home**, on the **Land and Soil**.

By returning home to the land and soil jurisdiction one by one, we populate the Assemblies and a free, de jure South Africa emerges.

Step forward and take responsibility for your future.

Become part of **The South African Assembly** to make a difference.
